- ❖ Evaluation method: In Semester Method:Continuous and comprehensive Evaluation (10%for Internal Assessment, 5% for group Discussion,/ Viva/ Seminar presentation,5% for class test and 80% for End Semester.
- ❖ ICT Classes: 2 classes for each semester.

Student Learning Outcomes in Sociology

By the time of graduation, sociology majors should be able to:

1. Articulate a sociological perspective.
2. Apply sociological theories to understand social phenomena.
3. Critically evaluate explanations of human behavior and social phenomena.
4. Apply scientific principles to understand the social world.
5. Evaluate the quality of social scientific methods and data.
6. Rigorously analyze social scientific data.
7. Use sociological knowledge to inform policy debates and promote public understanding.

Our degree programs are designed to produce graduates who can engage the world thoughtfully, critically, and creatively. Our hope is that the coursework we require will not only provide a solid base of anthropological or sociological knowledge and a set of skills to collect and evaluate information, but also that our assignments, readings, and classroom discussions will foster a sense of engagement as citizens committed to making the world more humane and liveable.

More specifically, each of our programs has articulated a set of learning outcomes for students. These outcomes are the basis for our on-going assessment of the effectiveness of our courses and our curricula.

- **Result of the Department for the last Five years**

YEAR	No,of Students	Pass %	No.of students who secured 1st Class	Progression		Employment
				UG to PG	U.G to B.Ed/LL.Bor if any	
2017	46	100%	07	No data available	No data available	No data available
2018	34	94%	09	01	02	1 student of the department is working as a Faculty Member in the Department of Computer Science in Women's College,Tinsukia
