PROGRAMME OUTCOME ATTAINMENT ANALYSIS (POAA)
WOMEN'S COLLEGE, TINSUKIA
BATCH: 2020-2023

1. Introduction:

Program Outcome Attainment Analysis (POAA) is a systematic means of analyzing the level of attainment of the stated outcome of a program that is being offered by a department in an academic institution. Normally the POAA is done under specific categories that can provide a good insight into the academic performance of a department and assess and evaluate the department as a successful provider of a University approved curriculum/ program.

Women's College, Tinsukia, an affiliated college under the Dibrugarh University is an undergraduate institution offering Honours Programmes in Arts and Commerce. Every department of the college offering specific program has its own stated **Program Outcome**, which is uploaded at the college website at the beginning of every academic session. At the end of every session, after the declaration of the results by the University, the departments prepare their respective POAA and submit to the IQAC. On receipt of POAAs from all departments, the IQAC prepares the overall POAA for the batch using the data received from the departments and from the Database of the college. The Overall POAA, on approval from the college authority, is then uploaded in the college website.

Specific heads under which the POAA is done are –

- **Enrolment pattern**
- **Dropout %**
- **Passed %**
- **Percentage of quality graduate (1st class)**
- **Progression %**
- **Employability.**
